## ABOUT

I am a dedicated web developer specializing in MERN stack technology, with a passion for solving challenging Data Structures and Algorithms (DSA) problems on various platforms. I possess excellent team management abilities, allowing me to effectively lead and collaborate with diverse teams to deliver successful projects.

## PROJECT

- **E-Commerce-Site**

Our e-commerce site is a cutting-edge platform built with React.js, Strapi, and Node.js. With a seamless user interface and advanced functionality, it offers a smooth shopping experience to customers. The integration of a secure payment gateway ensures safe and reliable transactions.

- **Chat-Web**

chat web application powered by React.js, Node.js, and Socket.io. Seamlessly connecting users, our platform enables instant communication and fosters engaging conversations. With a user-friendly interface and reliable backend, you can chat with friends, family, or colleagues in real-time.

- **MI-store**

The MI Store Clone project is a web application created using React.js and React Bootstrap, designed to replicate the look and feel of the official MI Store website. Leveraging the power of React.js, the project delivers a smooth and responsive user interface, ensuring a seamless browsing experience across devices.

## SKILLS

- MERN stack
- Strapi
- MySQL
- Basic AngularJs
